Research Identity

Associate Professor of International Business with twenty-seven years of academic experience, working at the intersection of international strategy and entrepreneurship in emerging and transition economies. My research advances two complementary streams: (i) the internationalization–performance relationship, including FDI entry-mode decisions and the push–pull determinants of foreign direct investment; and (ii) entrepreneurship under weak institutions, with a sustained programme on bribery, corruption, and informal-economy dynamics. This agenda is anchored empirically in Vietnam, ASEAN, and the Mekong Delta, and is published in field-leading outlets including *Entrepreneurship Theory and Practice*, *European Management Review*, and the *Asian Academy of Management Journal*. As Vice President of the School of Economics at Can Tho University, I combine scholarly inquiry with institutional leadership, doctoral supervision, and economic-policy advisory on logistics, institutional reform, and regional development. I also lead Can Tho University’s team in the European Commission-funded Erasmus+ CBHE project ECOViP (2023–2026), which translates my entrepreneurship research into capacity building for innovation, entrepreneurship, and employability in sustainable ecotourism across Vietnam and the Philippines.
